Bachelor's in Architecture

Aleppo University

📅 01/2008 - 01/2014

📍 Aleppo, Syria

Relevant areas: Architectural design | Urban planning | Interior architecture | Landscaping

PREVIOUS EXPERIENCE

Product Developer - Intern

Fogia

📅 03/2025 - 05/2025

📍 Stockholm

Architect

Amneby Arkitekter

📅 09/2017 - 12/2023

📍 Stockholm

LANGUAGES

English | Swedish | Arabic

PROFILE:

Game Programming student with an architecture background. I enjoy building player-facing systems, working closely with designers and creating tools for them to use.

PROJECTS

They Give Me Demons

📅 08/2026 - Present

Programmer | Level Design | C++ | Blueprints | Unreal Engine 5

TGMD is a first-person narrative horror game set in a psychiatric facility, developed as a collaboration between a school project and **Madröm Studio**.

- Co-developed the Game Event Manager as part of a two-person team.
- Developed the Time Manager system.
- Designed a game level and am currently developing a level-building tool to support the level design workflow.

Fred's Escape

Level Design | Asset Programmer | Team of 4 | Unreal Engine 5 | Blueprints | School project

Fred's Escape is an escape-room game set in a cursed mall.

- Set up the game level and core gameplay systems.
- Developed the second puzzle's logic using Blueprints.
- Created a timed curse mechanic that drains the world's color and triggers game over.

Dog Knight

Level Design | C# | Team of 7 | Unity | School project

Dog Knight is a dungeon crawler developed as a team project in Unity, where players fight through dungeon rooms and defeat enemies to progress.

- Developed the initial player movement system.
- Created the reward system, spawning treasure chests with money and weapons after defeating all enemies in a room.
- Designed the game levels with clear paths while placing environmental assets along the sides to keep player movement unobstructed.
